

Remarks

Claims are 1-20 pending, and claims 1-20 stand rejected. The Applicants respectfully traverse the rejection and request allowance of claims 1-20.

Drawings

The Applicants have amended the drawings as can be seen in the attached red-lined drawings. The Applicants have also included amended drawings incorporating the changes.

§ 102 Claim Rejections

The Examiner rejected claims 1-2, 6, 8, 11-12, 16, and 18 under 35 U.S.C. § 102 as being anticipated by U.S. Patent number 5,696,809 (Voit). The Applicants disagree.

Claim 1 of the pending application includes the following limitations:

“in the SCP system, transferring the caller-entered information to a destination processor, processing a destination routing code from the destination processor to determine a destination routing instruction, and transferring the destination routing instruction to the switching system” and

“in the switching system, routing the call to a destination in response to the destination routing instruction”.

Voit does not teach these limitations. Voit provides an AIN SCP that receives caller-entered information, selects a destination for the call based on the information, and transfers the call to a call server for the destination (column 12, lines 36-39 and lines 62-64). The SCP selects the destination based on the caller-entered information, and does not select the destination based on a routing code provided by a destination processor as in claim 1. Voit also does not state that caller-entered information is transferred to a destination processor in order to allow the destination processor to select the routing code as in claim 1.

In rejecting these limitations, the Examiner cites to columns 12-14 in Voit as cites to the call server. Even if the call server may be considered a destination processor as in claim 1, the Applicants cannot find where an SCP queries the call server with caller-entered information in order to receive a routing code to route the call. Voit consistently describes selecting an ACD using an SCP (or AIN) based on caller entered information. There is no description of querying a processor in the destination or under the control of the destination in order to provide routing to

the destination.

Based on the above remarks, the Applicants submit that claims 1-2, 6, 8, 11-12, 16, and 18 are not anticipated by Voit.

§ 103 Claim Rejections

The Examiner rejected claims 3-5 and 13-15 under 35 U.S.C. § 103 as being obvious over Voit and U.S. Patent number 6,574,319 (Latter). The Examiner rejected claims 7 and 17 as being obvious over Voit and U.S. Patent number 6,470,081 (Sbisa). The Examiner rejected claims 9-10 and 19-20 as being obvious over Voit and U.S. Patent number 5,524,146 (Morrisey). The Applicants submit that claims 3-5, 7, 9-10, 13-15, 17 and 19-20 are non-obvious for the same reasons described above.

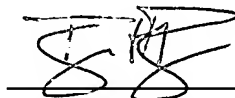

Conclusion

Based on the above remarks, the Applicants submit that claims 1-20 are allowable. There may be additional reasons in support of patentability, but such reasons are omitted in the interests of brevity. The Applicants respectfully request allowance of claims 1-20.

Any fees may be charged to deposit account 21-0765.

Respectfully submitted,

Date: 12-15-04
